

Introductory MapInfo Training

Learn the basics and more with Introductory Training at Insight GIS

Using MapInfo Professional can be daunting when you first start, so we offer two courses to get you up to speed: *Intro to MapInfo* and *MapInfo Professional Level 1*. These courses provide you with the knowledge, skills and experience you need to use MapInfo more effectively.

Our Introductory Courses teach you the fundamentals of MapInfo with simple explanations, hands-on learning and well-paced exercises that don't leave anyone behind. This ensures you take away the capability and confidence you need to successfully use MapInfo Professional back in the office.

Intro to MapInfo

Designed by Insight GIS, this course is suitable for you if you have no previous GIS experience. Throughout the course you learn basic MapInfo concepts and put them into practice with a series of projects.

Topics covered in the Intro to MapInfo course include:

- ▶ Fundamentals of GIS and MapInfo
- ▶ Extracting information using browsers, the info-tool and queries
- ▶ Spatial editing, analysis and layouts
- ▶ Customised project work to reinforce and expand the concepts learnt

MapInfo Professional Level 1

Designed by MapInfo, this course is suitable for you if you are familiar with MapInfo and comfortable with basic spatial and IT concepts. The course content is an extension of the Intro to MapInfo course and provides a more detailed insight into topics.

MapInfo Professional Level 1 consists of four modules dealing with specific MapInfo areas. Each section is complimented by comprehensive training notes and is reinforced through self paced projects.

The course outline includes:

- ▶ MapInfo Professional Basics
 - Layers, tables and workspaces
 - Displaying and manipulating spatial information
- ▶ Selections and Analysis
 - Gathering information from MapInfo
 - Creating graphs, thematic maps and cartographic legends
- ▶ Creating and Manipulating Data
 - Data creation
 - Linking tabular data with spatial information
 - Geocoding and creating points
 - Table maintenance
- ▶ Data Presentation and Output
 - Layouts
 - Hotlinks and exporting maps as images

The course was excellent – very hands on. Everything was explained in English and not techno-babble, which was great. I really enjoyed the two days.

Lisa Nelson, Strategic Projects Officer, Circular Head Council

Arriving with no knowledge of MapInfo I am leaving confident in my ability to create basic maps, so it was effective training in a short space of time.

Daniel Elson, Environmental Scientist, Aqueenal Pty Ltd
